PROFESSIONAL SUMMARY

Frappe and ERPNext developer at BrainWise, building SaaS products in an Agile team — including POSNext, an open-source Frappe/ERPNext point of sale (158 GitHub stars), plus NexDine and NexMove. Earlier work covers a corporate HR platform and government ERPNext systems across stock, selling, buying, workflows, and HR. Comfortable with Python backends, Vue.js, REST APIs, MySQL/MariaDB, and production ERPNext deployments.

TECHNICAL SKILLS

Frameworks: Frappe Framework, ERPNext — custom apps, DocTypes, workflows, reports, hooks, whitelisted APIs

Languages: Python (primary), JavaScript / Vue.js, HTML, CSS, Node.js, NestJS, Express.js

Data & APIs: MySQL / InnoDB (schema design, indexing, query optimization), MariaDB, MongoDB, REST APIs, third-party API sync, Frappe client/server scripts

Delivery: Git / GitHub, Linux server administration, production ERPNext deployment and maintenance, S3-compatible storage (MinIO)

Ways of working: Agile / Scrum, JIRA, product management, code review, pre-commit (ruff, eslint)

EXPERIENCE

Software Engineer

Feb 2026 – Present

BrainWise · Cairo, Egypt

- Build SaaS products in an Agile team, including POSNext (open-source Frappe/ERPNext POS, 158 GitHub stars), NexDine, and NexMove.
- Contribute backend Python modules, Frappe APIs, MySQL schema work, and production deployments for POSNext — invoicing, shift management, promotions, coupon validation, multi-payment and multi-currency flows.
- Design whitelisted Python API endpoints for the POS frontend and third-party integrations; implement offline-first data sync with background reconciliation.
- Maintain production ERPNext environments (deployment, upgrades, monitoring, hotfixes) and take part in open-source code review and pre-commit quality checks (ruff, eslint).

Software Engineer

Aug 2024 – Feb 2026

ArabDT · Cairo, Egypt

- Sole engineer for the HR system of a corporate group with branches in Egypt, Saudi Arabia, and the UAE.
- Built an HR mobile app as a SaaS product, and practiced Agile and product management in that work.
- Developed custom Frappe/ERPNext apps including the ArabDT HR Admin App, Hodori Attendance App, and an internal CRM.
- Customized ERPNext HR modules (leave, employee records, operational workflows), integrated third-party APIs, and built SQL-powered HR and operations reports.
- Automated backend workflows with Frappe hooks, scheduled jobs, and document events; maintained Linux production ERPNext environments and used JIRA for sprint planning.

Back-end Developer

Sep 2023 – Aug 2024

ERPCloud.Systems · Egypt

- Worked on government ERPNext projects covering stock, selling, buying, workflows, and parts of HR, including the Police Vehicles General Administration project at the Ministry of Interior.
- Designed custom Frappe DocTypes, forms, and server-side logic, and built REST APIs for inventory, HR, and finance modules used by web and mobile clients.
- Designed MySQL schemas and optimized queries for core ERP data flows.

PROJECTS

POSNext — Open-source ERPNext POS

BrainWise · 158 GitHub stars

- Offline-capable point of sale on the Frappe Framework.
- Backend Python modules, Frappe API layer, MySQL schema, and production deployment workflows.
- Promotions, shift reporting, multi-warehouse and multi-payment support.

ArabDT HR & Admin System · ArabDT

- ERPNext HR platform for employee records, permissions, leave, attendance, and reporting.
- Custom Frappe app with role-based access and approval workflows.

Hodori Attendance App · ArabDT

- Real-time attendance with an ERPNext backend and mobile check-ins.
- REST APIs for live mobile-to-ERP sync and shift reporting.

General Administration System · Egyptian Ministry of Interior

- ERPNext fleet management for the Police Vehicles General Administration.

Internal CRM System · ArabDT

- Custom Frappe CRM with DocTypes, dashboards, and sales-pipeline automation.

Lawyer Office Management System · Frappe / ERPNext · Arabic RTL

- Legal Case, Court Session, and Case Document DocTypes, with Arabic RTL support and a React frontend.
