

MOHAMED ALI HASSAN

Senior Frappe & ERPNext Developer | Python | API Integration | Cloud Deployment
+20 1013725009 • mohamedaliskmk@gmail.com • New Cairo, Egypt • [linkedin.com/in/mohammed-ali-smk-7800651a6](https://www.linkedin.com/in/mohammed-ali-smk-7800651a6)

PROFESSIONAL SUMMARY

Frappe/ERPNext Developer with 2.5+ years of production experience building, customizing, and deploying Frappe applications for enterprise clients across HR, POS, attendance, logistics, and CRM domains. Core contributor to POSNext — a widely adopted open-source ERPNext POS application (120+ GitHub stars) — responsible for backend Python development, REST API design, database optimization, and production deployments. Proficient in the full Frappe stack: Python, JavaScript, MySQL, REST APIs, Git, and Linux server environments. Passionate about building scalable, high-impact solutions for global clients.

TECHNICAL SKILLS

Framework:	Frappe Framework, ERPNext — custom apps, DocTypes, workflows, reports, hooks, whitelisted APIs
Languages:	Python (primary), JavaScript, HTML, CSS, Node.js, NestJS, Express.js
Databases:	MySQL / InnoDB (query optimization, schema design, indexing), MongoDB, MariaDB
APIs:	REST API design & integration, third-party API sync, Frappe client/server scripts
DevOps:	Git / GitHub, Linux server administration, production deployment & maintenance
Tools:	JIRA, Agile/Scrum, VS Code, pre-commit (ruff, eslint), code review workflows
Cloud:	S3-compatible storage (MinIO), cloud-based ERPNext deployments

PROFESSIONAL EXPERIENCE

Software Engineer & Backend / DB Contributor | [BrainWise](#) Feb 2026 – Present

- Core contributor to POSNext — open-source Frappe/ERPNext POS app with 120+ GitHub stars and 142 forks
- Develop and customize Frappe application modules: invoicing, shift management, promotional engine, coupon validation, multi-payment and multi-currency flows
- Design and build whitelisted Python API endpoints powering POS frontend and third-party integrations
- Optimize MySQL/InnoDB schemas and queries for high-throughput transactional POS workloads
- Implement offline-first data sync architecture with background reconciliation pipelines
- Maintain production ERPNext environments: deployment, upgrades, monitoring, and hotfixes
- Participate in open-source code reviews, release management, and pre-commit quality enforcement (ruff, eslint)
- Collaborate with cross-functional remote teams across design, QA, and product

Software Engineer | [ArabDT](#) Aug 2024 – Feb 2026

- Developed and deployed multiple custom Frappe/ERPNext apps: ArabDT HR Admin App, Hodori Attendance App, internal CRM system
- Customized ERPNext modules for HR, leave management, employee records, and operational workflows
- Integrated third-party APIs with ERPNext for real-time data synchronization across business systems
- Built dynamic, complex SQL-powered reports for HR and operations management
- Automated backend workflows using Frappe hooks, scheduled jobs, and document event triggers
- Maintained Linux-based production ERPNext environments and handled deployment pipelines
- Worked in Agile environment using JIRA for sprint planning and task tracking

ERPNext Developer | [ERPCloud Systems](#) Sep 2023 – Aug 2024

- Designed and implemented custom Frappe DocTypes, forms, and server-side logic for ERP business modules
- Developed robust REST APIs for inventory, HR, and finance modules consumed by web and mobile clients

- Crafted MySQL database schemas and optimized queries powering core ERP data flows
- Delivered ERPNext customizations for multiple clients, optimizing processes and enhancing system efficiency

KEY PROJECTS

POSNext — Open-Source ERPNext POS (BrainWise) ★ 120+ GitHub Stars

- Modern, offline-capable POS system built on Frappe Framework — one of the most adopted ERPNext POS solutions
- Contributed backend Python modules, Frappe API layer, MySQL schema design, and production deployment workflows
- Implemented promotional engine, shift reporting, multi-warehouse and multi-payment support

ArabDT HR & Admin System

- Full ERPNext-based HR platform: employee records, permissions, leave applications, attendance, and reporting
- Custom Frappe app with complex role-based access control and automated approval workflows

Hodori Attendance App

- Real-time attendance system with ERPNext backend and mobile integration for live check-ins and shift reporting
- REST API-driven architecture enabling seamless mobile-to-ERP data sync

General Administration System — Egyptian Ministry of Interior

- Government-grade ERPNext solution for police vehicle fleet management with secure data handling requirements

Internal CRM System — ArabDT

- Custom Frappe-based CRM with tailored DocTypes, dashboards, and sales pipeline automation

Lawyer Office Management System

- Frappe/ERPNext system with Arabic RTL support: Legal Case, Court Session, and Case Document DocTypes with React frontend

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Engineering — Modern Academy Maadi, Egypt | 2018 – 2023

Back-End Application Development with Node.js and Express — edX Verified Certificate | Jun 2025
